InfoWave and Scortel Announce Distribution Partnership in Bulgaria

Singapore, March 27, 2007 – InfoWave Pte Ltd, the leading provider of mobile data acquisition (MDA), mobile data terminals (MDT), and advanced mobile terminals (AMT) for transportation, logistics, public safety, and homeland security/defense industries, has announced a distribution partnership with Scortel Ltd, an end-to-end fleet management solutions provider in Bulgaria.

Under the terms of the agreement, Scortel will distribute InfoWave's Waveon 606 MDA and 738 MDT products, establish and support resellers and their end user customers within Bulgaria. All demand creation, engineering support and product distribution will be managed locally through Scortel's office.

Speaking of the partnership, Loh Choon Seng, Managing Director of InfoWave commented, "Given our focus on expanding our Waveon product offerings, our goal was to partner with a distributor offering excellent market access and a dynamic sales approach to support our product strategy. Scortel was a clear choice. It has successfully built a business offering fleet management and navigation systems. We look forward to leveraging Scortel's fleet management and navigation expertise to strengthen our distribution presence in the transportation industry in Bulgaria."

"We are very excited about the partnership with InfoWave. InfoWave's strong reputation in telematics hardware will strengthen Scortel's competitive positioning and allow us to provide a complete fleet management and navigation solution with technologically competitive products," said Valery Taznov, Technical Director of Scortel.

Scortel has successfully implemented Waveon 606 MDA and 728 MDT in a fleet of fishing vessels as part of its Fishery Vessels Monitoring System (FVMS) for the National Agency of Fisheries and Aquaculture (NAFA), which is an agency under the Ministry of Agriculture and Forestry (MFA) in November 2006.

About Scortel

Scortel offers delivery, implementation, technical support, system integration and consultancy services for fleet management and navigation systems, mobile satellite communications, maritime navigation and equipments, intelligent city transport systems (passenger transportation information systems). Its clientele include companies in the road, river, maritime, and air transportation sectors. Some of Scortel's accomplishments include fleet tracking and management system for ambulances in Sofia and 8 regional centres in Bulgaria (GSM/GPRS based); fishery vessels monitoring system for Bulgarian fishery fleet based on Inmarsat-C and GSM/GPRS networks; and fleet tracking and management systems for private road transport companies and for governmental users based on Inmarsat-C and GSM/GPRS networks. For more information, please visit www.scortel.com.
